**ASM DIGITAL TECHNOLOGIES INC**  
(Formerly known as PINNACLE TALENT INC)  
**Notes to Standalone Financial Statements for the year ended March 31, 2024**

**1 CORPORATE INFORMATION:**

ASM Digital Technologies Technologies Inc (Formerly Known as Pinnacle Talent Inc) ("the Company") is a company incorporated in USA and is a wholly owned subsidiary of ASM Technologies Limited. The Company is in the business of development of software and allied services. The financial statements have been approved by the Board of Directors of the Company in their meeting held on May 27, 2024.

**2 MATERIAL ACCOUNTING POLICIES:**

**2 Basis of Preparation:**

In accordance with the notification issued by the Ministry of Corporate Affairs, the Company has adopted Indian Accounting Standards ('Ind AS') notified under the Companies (Indian Accounting Standards) Rules, 2015 with effect from April 1, 2017. The financial statements of the Company are prepared and presented in accordance with Ind AS.

The financial statements have been prepared on the historical cost basis, except for certain financial instruments which are measured at fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

**2 Summary of material accounting policies:**

**a) Use of Estimates:**

The preparation of financial statements in conformity with Ind AS requires the management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods. Any revision to accounting estimates is recognized prospectively.

**b) Current versus non-current classification:**

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle.
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is treated as current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/ liabilities are classified as non-current assets/ liabilities.

**c) Property, Plant & Equipment:**

Property, plant and equipment ("PPE") are stated at the cost of acquisition less accumulated depreciation and write down for, impairment if any. Direct costs are capitalised until the assets are ready to be put to use. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost of the item can be measured reliably. All other expenses on existing assets, including day-to-day repair and maintenance expenditure and cost of replacing parts, which do not meet the definition of PPE as per Ind AS 16 are charged to the statement of profit and loss for the period during which such expenses are incurred.

Gains or losses arising from de-recognition of PPE are measured as the difference between the net disposal proceeds and the carrying amount of PPE and are recognized in the statement of profit and loss when the PPE is derecognized.

**d) Depreciation:**

Depreciation is provided on straight-line method as per the rates specified in schedule II of the Companies Act, 2013 ("the Act"). Depreciation for the assets purchased/sold during the year is proportionately charged. The assets' residual values and useful lives are reviewed at each financial year end or whenever there are indicators for revision, and adjusted prospectively.

**e) Investment Properties:**

Investment property represents properties held for rental yields and/or for capital appreciation or both rather than for:

- (a) use in the production or supply of services or for administrative purposes; or
- (b) sale in the ordinary course of business.

Investment property is stated at the cost of acquisition less accumulated depreciation.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost of the item can be measured reliably. All other expenses on existing assets, including day-to-day repair and maintenance expenditure and cost of replacing parts, which do not meet the definition of Investment Property as per Ind AS 40 are charged to the statement of profit and loss for the period during which such expenses are incurred.

**f) Intangible Assets:**

Intangible assets acquired separately are measured on initial cost. Subsequently, carried at cost less accumulated amortization and accumulated impairment losses, if any.

Intangible assets comprising of computer software are amortised over a period of three years as estimated by the management.

Gains or losses arising from de-recognition of an intangible asset are measured as a difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss when asset is derecognised.

**g) Leases:**

*Where Company is a Lessee:*

The Company's lease asset classes primarily consist of leases for buildings. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- (i) the contact involves the use of an identified asset
- (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease
- (iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements include the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities include these options when it is reasonably certain that they will be exercised.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Company changes its assessment if whether it will exercise an extension or a termination option.

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

**h) Employee Benefits:**

*(i) Short term employee benefits:*

The employee benefits payable wholly within twelve months of rendering the service are classified as short term employee benefits. Benefits such as salaries, leave travel allowance, short term compensated absences etc. and the expected cost of bonus are recognised in the period in which the employee renders the related service.

*(ii) Defined Benefit Plans:*

Gratuity, which is a defined benefit plan, is accrued based on an independent actuarial valuation, which is done based on project unit credit method as at the balance sheet date. The Company recognizes the net obligation of a defined benefit plan in its balance sheet as an asset or liability. Gains and losses through re-measurements of the net defined benefit liability/ (asset) are recognized in other comprehensive income. In accordance with Ind AS, re-measurement gains and losses on defined benefit plans recognized in OCI are not to be subsequently reclassified to statement of profit and loss. As required under Ind AS compliant Schedule III, the Company recognizes re-measurement gains and losses on defined benefit plans (net of tax) to retained earnings.

The Company doesn't have a policy for encashment of leave

**i) Revenue Recognition:**

The Company derives revenues primarily from IT related services. Effective April 01,2018, the Company has adopted Ind AS 115, "Revenue from Contracts with Customers". Revenue is recognized upon transfer of control of promised services to customers in an amount that reflects the consideration we expect to receive in for those services.

Revenue on time-and-material contracts are recognized as the related services are performed and revenue from the end of the last invoicing to the reporting date is recognized as unbilled revenue. Revenue from fixed-price, fixed-timeframe contracts, where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognized as per the percentage-of-completion method. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such uncertainty is resolved. Efforts or costs expended have been used to measure progress towards completion as there is a direct relationship between input and productivity.

The Company recognised incentive from government in respect of Service Exports from India Scheme based on claim lodged by the Company.

**j) Taxation:**

Income tax expense comprises current tax expense and the net change in the deferred tax asset or liability during the year. Current and deferred tax are recognized in statement of profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity, respectively.

**k) Foreign Currency Transactions:**

*Functional Currency:*

The functional currency of the Company is the US Dollar.

*Transactions and translations:*

Foreign currency transactions are recorded at exchange rates prevailing on the date of the transaction. Foreign currency denominated monetary assets and liabilities are restated into the functional currency using exchange rates prevailing on the balance sheet date. Gains and losses arising on settlement and restatement of foreign currency denominated monetary assets and liabilities are included in the statement of profit and loss.

**l) Provisions, Contingent liabilities and Contingent assets:**

A provision is recognized when an enterprise has a present obligation (legal or constructive) as result of past event and it is probable that an outflow of embodying economic benefits of resources will be required to settle a reliably assessable obligation. Provisions are determined based on best estimate required to settle each obligation at each balance sheet date. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Provisions for onerous contracts, i.e. contracts where the expected unavoidable costs of meeting obligations under a contract exceed the economic benefits expected to be received, are recognized when it is probable that an outflow of resources embodying economic benefits will be required to settle a present obligation as a result of an obligating event, based on a reliable estimate of such obligation.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements. A contingent asset is never recognised but only disclosed in the financial statements.

**m, Segment reporting policies:**

*Identification of segments:*

Operating Segments are identified on the basis of internal reports about components of the group that are regularly reviewed by the chief operating decision maker (CODM) in order to allocate resources to the segments and to assess their performance in accordance with Ind AS 108, Operating Segments. Since CODM evaluates Company's performance at a geographic segment level, operating segment information is accordingly given at geographic level.

**n) Financial Instruments:**

Financial assets and liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

*i) Cash & Cash equivalents:*

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

*ii) Financial assets at amortized cost:*

Financial assets are subsequently measured at amortized cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

*iii) Financial assets at fair value through other comprehensive income:*

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

*iv) Financial assets at fair value through profit or loss:*

Financial assets are measured at fair value through profit or loss unless it is measured at amortized cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognized in statement of profit and loss.

*v) Financial liabilities:*

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit or loss. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

*vi) De-recognition of financial instruments:*

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized when the obligation specified in the contract is discharged or cancelled or expires.

*vii) Fair value of financial instruments:*

In determining the fair value of its financial instruments, the Company uses following hierarchy and assumptions that are based on market conditions and risks existing at each reporting date.

Fair value hierarchy:

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

► Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

*viii) Investments in subsidiary:*

Investments in subsidiary is carried at cost.

***o) Impairment:***

*i) Financial assets:*

The Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Company recognises lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

*ii) Non-financial assets:*

Tangible and Intangible assets: PPE, intangible assets and investment property with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs. If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the statement of profit and loss.

***p) Cashflow Statement:***

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated. The Company considers all highly liquid investments that are readily convertible to known amounts of cash to be cash equivalents.

**2 Significant accounting judgements, estimates and assumptions:**

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

*a) Judgements:*

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the financial statements:

*(b) Estimates and assumptions:*

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

*Defined benefit plans - Gratuity*

The cost of the defined benefit gratuity plan and other post-employment medical benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds

The mortality rate is based on publicly available mortality tables. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases are based on expected future inflation rates and expected salary increase thereon.

**c. Nature and purpose of reserves:**

**i) General Reserve:**

The general reserve is a free reserve which is used from time to time to transfer profits from retained earnings for appropriation purposes. As the general reserve is created by a transfer from one component of equity to another and is not an item of other comprehensive income.

**ii) Security Premium:**

Securities premium is used to record the premium on issue of shares. The reserve is utilised in accordance with the provisions of section 52 of the Companies Act, 2013.

**iii) Retained Earnings:**

It comprises of the accumulated profits/(loss) of the Company.

**ASM Digital Engineering Private Limited**  
**Notes to Financial Statements for the period ended March 31, 2024**

**1 BACKGROUND:**

ASM Digital Engineering Private Limited ("the Company") is a private limited company formerly known as Semcon India Private Limited incorporated under the provisions of the Companies Act, 2013 ("the Act") on March 17, 2006 and is domiciled in India. During the year 2020 - 21 ASM Technologies Limited has acquired the shares of the Company

The principle activities of the Company includes designing, customization, engineering, developing, prototyping of spares, processes, ideas including inception of projects and products, solutions, software, hardware used in the aeronautic, automotive, electronics, life sciences, packaging, industrial and aviation industry and industries engaged in manufacturing and processing of goods and services of every kind and description and to carry on the business of prototypes of model and show-cars, rapid prototyping and tools and prototypes and IT enabled services.

The financial statements of the Company has been approved by its Board of Directors in its Board meeting held on May 27, 2024.

**2 MATERIAL ACCOUNTING POLICIES:**

**2.1 Basis of Preparation:**

**a) Statement of Compliance:**

The financial statements have been prepared on the historical cost basis, except for certain financial instruments which are measured at fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

**b) Basis of measurements:**

The standalone financial statements have been prepared on the historical cost basis except for the following items:

| Items                                    | Measurement basis   |
|--|---|
| Certain financial assets and liabilities | Fair Value  |
| Net defined benefit (asset)/liability    | Fair value of plan assets less present value of defined benefit obligations |

**2.2 Summary of Material accounting policies:**

**(a) Use of estimates**

The preparation of financial statements in conformity with Ind AS requires the management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods. Any revision to accounting estimates is recognized prospectively.

**(b) Current versus non-current classification:**

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle.
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is treated as current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred tax assets/ liabilities are classified as non-current assets/ liabilities.

**ASM Digital Engineering Private Limited**  
**Notes to Financial Statements for the period ended March 31, 2024**

**(c) Property, plant and equipments**

(i) Property, plant and equipment ("PPE") are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

(ii) Each part of an item of PPE with a cost that is significant in relation to the total cost of the item is depreciated separately. This applies mainly to components for machinery. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in income statement as and when incurred.

(iii) Subsequent expenditure related to an item of PPE is added to its book value only if it increases the future benefits from its previously assessed standard of performance. All other expenses on existing property, plant and equipment, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the income statement for the period during which such expenses are incurred.

(iv) An item of PPE and any significant part initially recognized is de-recognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the Property, plant and equipment is de-recognized.

(vi) Advances paid towards the acquisition of PPE outstanding at each balance sheet date is classified as capital advances under other non-current assets.

**(d) Depreciation on PPE:**

Depreciation on PPE is calculated on a straight-line basis using the useful lives of the assets as estimated by the management; as below:

| Category                         | Useful lives estimated by the management (years) |
|----------------------------------|--|
| Computers and computer equipment | 3 years  |
| Office equipment                 | 5 years  |
| Electrical equipment             | 10 years   |
| Furniture and fixtures           | 10 years   |
| Vehicles                         | 8 years  |

The useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

**(e) Intangible assets**

Intangible assets are stated at cost less accumulated amortization and impairment. Intangible assets are amortized over their respective estimated individual useful lives on a straight-line basis, from the date that they are available for use. The estimated useful life of an identifiable intangible asset is based on a number of factors including the effects of obsolescence, demand, competition and other economic factors (such as stability of the industry, and known technological advances), and the level of maintenance expenditures required to obtain the expected future cash flows from the asset. Amortization methods and useful lives are reviewed periodically including at each financial year end.

Intangible assets are amortized on a straight-line basis over the estimated useful economic life, as below:

| Category          | Useful life (in years) |
|-------------------|------------------------|
| Computer software | 3 years                |

The amortization period and the amortization method are reviewed at least at each financial year end.

**(f) Impairment :**

1) Financial Asset:

the Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. the Company recognises lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

**ASM Digital Engineering Private Limited**  
**Notes to Financial Statements for the period ended March 31, 2024**

2) Non-financial asset:

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

Impairment losses are recognized in the statement of profit and loss. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

**(g) Leases**

**Where the Company is lessee**

The Company's lease asset classes primarily consist of leases for buildings. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- (i) the contact involves the use of an identified asset
- (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease
- (iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. Right of use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Company changes its assessment if whether it will exercise an extension or a termination option.

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

The borrowing rate applied to lease liabilities for discounting is 10%

**(h) Revenue recognition**

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

The Company collects taxes such as goods and service tax etc on behalf of the government and, therefore, these are not economic benefits flowing to the company. Hence, they are excluded from the aforesaid revenue/income.

**Income from services**

- i. Revenue is recognized on an accrual basis as the service are rendered to group companies, on the basis of an agreed mark-up on cost incurred, in accordance with the agreement.
- ii. Revenue from services relating to time and material contracts, are recognized ratably over the period as services are performed.
- iii. Revenues from fixed price contracts, that include customer acceptance clauses relating to specific deliverables, are recognized under the percentage completion method based on actual hours incurred as a percentage of total estimated hours. Estimated total contract hours are reviewed periodically and revenue adjustments, if necessary, are recorded over the remaining contract term. Costs are recognized as incurred.
- iv. The amount of revenue can be measured reliably;
- v. It is probable that the economic benefits associated with the transactions will flow to the Company;
- vi. The costs incurred or to be incurred in respect of the transaction can be measured reliably;

**Interest Income**

Interest is accounted as per effective interest method. Interest income is included under the head "other income" in the statement of profit and loss.

**i) Employee Benefits:**

*(i) Short term employee benefits:*

The employee benefits payable wholly within twelve months of rendering the service are classified as short term employee benefits. Benefits such as salaries, leave travel allowance, short term compensated absences etc. and the expected cost of bonus are recognised in the period in which the employee renders the related service.

*(ii) Long term employee benefits:*

*(a) Defined Contribution Plans:*

the Company has contributed to state governed provident fund scheme which are defined contribution plans. The contribution paid/payable under the schemes is recognised during the period in which employee renders the related service.

*(b) Defined Benefit Plans:*

Gratuity, which is a defined benefit plan, is accrued based on an independent actuarial valuation, which is done based on project unit credit method as at the balance sheet date. the Company recognizes the net obligation of a defined benefit plan in its balance sheet as an asset or liability. Gains and losses through re-measurements of the net defined benefit liability/ (asset) are recognized in other comprehensive income. In accordance with Ind AS, re-measurement gains and losses on defined benefit plans recognized in OCI are not to be subsequently reclassified to statement of profit and loss. As required under Ind AS compliant Schedule III, the Company recognizes re-measurement gains and losses on defined benefit plans (net of tax) to retained earnings.

Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short-term employee benefit. the Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

the Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method, made at the end of each financial year. Actuarial gains/losses are immediately taken to the statement of profit and loss. the Company presents the accumulated leave liability as a current liability in the balance sheet, since it does not have an unconditional right to defer its settlement for twelve months after the reporting date.

**(j) Foreign exchange translation**

**(i) Initial recognition**

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

**(ii) Conversion**

Foreign currency monetary items are retranslated using the exchange rate prevailing at the reporting date. Non-monetary items, which are measured in terms of historical cost denominated in a foreign currency, are reported using the exchange rate at the date of the transaction. Non-monetary items, which are measured at fair value or other similar valuation denominated in a foreign currency, are translated using the exchange rate at the date when such value was determined.

**(iii) Exchange differences**

Exchange differences arising on the settlement of monetary items or on reporting Company's monetary items at rates different from those at which they were initially recorded during the period, or reported in previous financial statements, are recognized as income or as expenses in the period in which they arise.

**(i) Income Taxes:**

Income tax expense comprises current tax expense and the net change in the deferred tax asset or liability during the year. Current and deferred tax are recognized in the statement of profit and loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity, respectively.

**(i) Current Income Tax:**

Current income tax for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the taxable income for that period. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the balance sheet date.

**ASM Digital Engineering Private Limited**  
**Notes to Financial Statements for the period ended March 31, 2024**

**(ii) Deferred Income Tax:**

Deferred income tax is recognised using the balance sheet approach, deferred tax is recognized on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes, except when the deferred income tax arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profit or loss at the time of the transaction.

Deferred income tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date.

**(k) Earnings per share**

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

**(l) Provisions and Contingent liabilities:**

A provision is recognized when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

A contingent liability is a possible obligation that arises from past events whose existence will be conCompanyed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. the Company does not recognize a contingent liability but discloses its existence in the financial statements.

**(m) Financial Instruments:**

Financial assets and liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

**(i) Cash and Cash equivalents**

the Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

**(ii) Financial assets at amortized cost:**

Financial assets are subsequently measured at amortized cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

**(iii) Financial assets at fair value through other comprehensive income:**

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

**ASM Digital Engineering Private Limited**  
**Notes to Financial Statements for the period ended March 31, 2024**

**(iv) Financial assets at fair value through profit or loss:**

Financial assets are measured at fair value through profit or loss unless it is measured at amortized cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognized in statement of profit and loss.

**(v) Financial liabilities:**

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit or loss. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

**(vi) De-recognition of financial instruments:**

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized when the obligation specified in the contract is discharged or cancelled or expires.

**(vii) Fair value of financial instruments:**

In determining the fair value of its financial instruments, the Company uses following hierarchy and assumptions that are based on market conditions and risks existing at each reporting date.

Fair value hierarchy:

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- ▶ Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ▶ Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- ▶ Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

**2.3 Significant accounting judgements, estimates and assumptions:**

The preparation of the Company's standalone financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

*a) Judgements:*

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the financial statements:

*b) Estimates and assumptions:*

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

Defined benefit plans - Gratuity

The cost of the defined benefit gratuity plan and other post-employment medical benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds

The mortality rate is based on publicly available mortality tables. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases are based on expected future inflation rates and expected salary increase thereon.

**(a) Rights, preferences and restrictions attached to shares**

The Company has only one class of equity shares having a par value of Rs. 10 per share. Each holder of equity shares is entitled to one vote per share. The Company declares and pays dividends in Indian rupees. The dividend proposed by the Board of Directors is subject to the approval of the share holders in the ensuing Annual General Meeting.

In the event of liquidation of the Company, the holders of equity shares will be entitled to receive remaining assets of the Company, after distribution of all preferential amounts. The distribution will be in proportion to the number of equity shares held by the shareholders.

**ASM Digital Engineering Private Limited**  
**Notes to financial statements for the year ended March 31, 2024**

**24 Income taxes**

The major components of income tax expense for the years ended March 31, 2024 and March 31, 2023 are:

i) **Statement of profit and loss:**

**Profit or loss section**

| Particulars   | Current Year  | Previous Year |
|---|---------------|---------------|
| <b>Current income tax:</b><br>Current income tax in India                             | 0.96          | 13.80         |
| <b>Deferred tax:</b><br>Relating to origination and reversal of temporary differences | (3.84)        | (3.44)        |
| Prior year tax  | -             | -             |
| <b>Income tax expense reported in the statement of profit or loss</b>                 | <b>(2.88)</b> | <b>10.36</b>  |
| <b>OCI section</b>  |               |               |
| Deferred tax related to items recognised in OCI during the year:                      | 0.18          | (0.24)        |
| <b>Income tax charged to OCI</b>  | <b>0.18</b>   | <b>(0.24)</b> |

ii) **Reconciliation of tax expense and the accounting profit multiplied by India's domestic tax rate for end of the year:**

| Particulars  | Current Year | Previous Year |
|--|--------------|---------------|
| Accounting profit before income tax  | (13.82)      | 15.59         |
| Enacted income tax rate in India   |              |               |
| Tax at the applicable tax rate of 25.17% (March 31, 2023: 25.17%)  | (3.48)       | 3.92          |
| <i>Non-deductible expenses for tax purposes:</i>   |              |               |
| Inadmissible expenses  | -            | 0.00          |
| Temporary differences not considered for current tax calculation (net of amounts recognised in other comprehensive income) | 1.87         | 5.81          |
| Difference in profit on account of Ind AS adjustments  | (0.09)       | 3.92          |
| Additional provision/ unabsorbed losses  | 1.70         | 0.15          |
| Excess provision of earlier year reversed  | 0.96         |               |
| <b>At the effective income tax rate of 25.17% (March 31, 2023: 25.17%) - Income tax expense recorded in the books</b>      | <b>0.96</b>  | <b>13.80</b>  |

The tax rates under Indian Income Tax Act, for the year ended March 31, 2024 and March 31, 2023 is 25.17% and 25.17% respectively

iii) The Company has entered into transactions with its associated enterprises within the meaning of section 92A of the Income Tax Act, 1961. The Company is in the process of carrying out transfer pricing study in this regard, to comply with the requirements of the Income Tax Act, 1961. The Management is of the view that all these transactions have been made at arms' length terms and hence the aforesaid provisions do not have any impact on the financial statements, particularly on the amount of tax expenses and that of provision for taxation.

**ASM Digital Engineering Private Limited**  
**Notes to financial statements for the year ended March 31, 2024**

**25 Gratuity and other post-employment benefits**

**i) Gratuity**

The Company has a defined benefit gratuity plan. The gratuity plan is governed by the Payment of Gratuity Act, 1972. Every employee who has completed five years or more of service is entitled to gratuity of 15 days salary (last drawn salary) for each completed year of service. The scheme is unfunded.

The following tables summarize the components of net benefit expense recognized in the statement of profit and loss and amounts recognized in the balance sheet for the gratuity plan:

**Statement of Profit and Loss**

**Net employee benefit expenses recognised in the employee cost:**

| Particulars                | Current Year | Previous Year |
|----------------------------|--------------|---------------|
| Current service cost       | <b>3.11</b>  | 2.35          |
| Past service cost          | -            | -             |
| Interest cost              | <b>0.84</b>  | 0.56          |
| <b>Net benefit expense</b> | <b>3.95</b>  | <b>2.91</b>   |

**Balance sheet**

**Benefit asset/liability:**

| Particulars                                 | As at March 31, 2024 | As at March 31, 2023 |
|---|----------------------|----------------------|
| Present value of defined benefit obligation | <b>(13.61)</b>       | (11.56)              |
| Fair value of plan assets                   | -                    | -                    |
| <b>Plan asset/(liability)</b>               | <b>(13.61)</b>       | <b>(11.56)</b>       |

**Changes in the fair value of defined benefit obligation are as follows:**

| Particulars   | As at March 31, 2024 | As at March 31, 2023 |
|---|----------------------|----------------------|
| Opening defined benefit obligation                            | <b>11.56</b>         | 9.91                 |
| Current service cost  | <b>3.11</b>          | 2.35                 |
| Past service cost   | -                    | -                    |
| Interest cost   | <b>0.84</b>          | 0.56                 |
| Liability transferred out/divestments                         | -                    | -                    |
| Benefits paid directly by employer                            | <b>(1.18)</b>        | (2.20)               |
| Benefits paid directly from fund                              | -                    | -                    |
| <b>Remeasurements</b>   | -                    | -                    |
| Actuarial loss/(gain) from changes in demographic assumptions | <b>(1.92)</b>        | -                    |
| Actuarial loss/(gain) from changes in financial assumptions   | <b>(0.44)</b>        | (0.73)               |
| Actuarial loss/(gain) from experience over the past period    | <b>1.64</b>          | 1.67                 |
| <b>Closing defined benefit obligation</b>                     | <b>13.61</b>         | <b>11.56</b>         |

**The amounts recognized in the Balance Sheet are as follows:**

| Particulars   | As at March 31, 2024 | As at March 31, 2023 |
|---|----------------------|----------------------|
| Present value of the obligation as at the end of the year     | <b>13.61</b>         | 11.56                |
| Fair value of plan assets as at the end of the year           | -                    | -                    |
| <b>Net liability/ (asset) recognized in the Balance Sheet</b> | <b>13.61</b>         | <b>11.56</b>         |

**The principal assumptions used in**

| Particulars            | Current Year                             | Previous Year |
|------------------------|--|---------------|
| Discount rate          | <b>7.14%</b>                             | 7.29%         |
| Employee turnover      | <b>25.00%</b>                            | 25.00%        |
| Salary escalation rate | <b>7.00%</b>                             | 8.50%         |
| Mortality table        | Indian Assured Lives Mortality (2012-14) |               |

The estimates of future salary increases, considered in actuarial valuation, take account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

**Sensitivity Analysis of significant actuarial assumptions**

| Particulars            | Change in DBO by           |               |
|------------------------|----------------------------|---------------|
|                        | Current Year               | Previous Year |
| Discount rate          | Increases 1% <b>(0.31)</b> | (0.40)        |
|                        | Decreases 1% <b>0.33</b>   | 0.43          |
| Employee turnover      | Increases 1% <b>(0.14)</b> | (0.14)        |
|                        | Decreases 1% <b>0.14</b>   | 0.15          |
| Salary escalation rate | Increases 1% <b>0.32</b>   | 0.42          |
|                        | Decreases 1% <b>(0.31)</b> | (0.40)        |

**ASM Digital Engineering Private Limited**  
**Notes to financial statements for the year ended March 31, 2024**

Sensitivity Analysis was not provided for the Previous year as Ind AS 19 was not applicable and AS 15 Employee Benefit Expenses as the standard does not mandate to provide the Sensitivity Analysis.

**Description of funding arrangements and funding policy that affect future contributions**

The plan is unfunded and the status is unlikely to change over the next few years.

| <b>Maturity profile</b>  |  | <i>(Rs in millions)</i> |                      |
|--|--|-------------------------|----------------------|
| <b>Projected Benefits Payable in Future Years From the Date of Reporting</b> |  | <b>Current Year</b>     | <b>Previous Year</b> |
| 1st following year   |  | 3.54                    | 1.86                 |
| 2nd following year   |  | 2.71                    | 1.90                 |
| 3rd following year   |  | 2.22                    | 1.70                 |
| 4th following year   |  | 2.17                    | 1.61                 |
| 5th following year   |  | 1.80                    | 1.67                 |
| Sum of years 6 to 10   |  | 3.37                    | 4.65                 |
| Sum of 11 years and above  |  | 0.63                    | 2.39                 |

| <b>Other Information</b>                                      |  | <b>Current Year</b> | <b>Previous Year</b> |
|---|--|---------------------|----------------------|
| Weighted average duration of the projected benefit obligation |  | 3.00                | 5.00                 |
| Average expected future service                               |  | 2.00                | 3.00                 |

**ii) Leave Benefits:**

An actuarial valuation of leave benefits is carried out every year by an independent actuary. Based on that, the Company is carrying a liability of Rs.12.39 million.

The principal assumptions used in determining pension and post-employment benefit obligations for the company's plans are shown below:

| Particulars            | Current Year                             | Previous Year |
|------------------------|--|---------------|
| Discount rate          | 7.29%                                    | 7.29%         |
| Employee turnover      | 25.00%                                   | 25.00%        |
| Salary escalation rate | 8.50%                                    | 8.50%         |
| Mortality table        | Indian Assured Lives Mortality (2012-14) |               |

**iii) Defined contribution plan**

The Company also has defined contribution plans. Contributions are made to provident fund in India for employees at the rate of 12% of basic salary as per regulations. The contributions are made to registered provident fund administered by the government. The obligation of the Company is limited to the amount contributed and it has no further contractual nor any constructive obligation. The expense recognised during the period towards defined contribution plan is Rs.23.23 million (Previous Year: Rs.17.12 million)

**26 Disclosure on leases:**

(i) The following is the movement of lease liabilities during the year ended March 31, 2024

| Particulars                                | As at March 31, 2024 | As at March 31, 2023 |
|--|----------------------|----------------------|
| Balance at the beginning of the year       | 89.66                | 20.28                |
| On account of implementation of Ind AS 116 | -                    | 76.67                |
| Finance cost accrued during the year       | 7.90                 | 8.84                 |
|  | 32.61                | 16.13                |
| <b>Balance at the end of the year</b>      | <b>64.95</b>         | <b>89.66</b>         |

The Company does not face a liquidity risk with regard to its lease liabilities as the current assets are sufficient to meet the obligations related to lease liabilities as and when they fall due.

(ii) Details regarding the contractual maturities of lease liabilities as at March 31, 2024 on undiscounted basis:

| Particulars          | As at March 31, 2024 | As at March 31, 2023 |
|----------------------|----------------------|----------------------|
| Less than one year   | 23.72                | 32.62                |
| One to five years    | 52.18                | 75.90                |
| More than five years |                      | -                    |
| <b>Total</b>         | <b>75.90</b>         | <b>108.52</b>        |

**Notes:**

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 inputs are unobservable inputs for the asset or liability.

There have been no transfers between the levels during the period.

The carrying amounts of trade receivables, trade payables, capital creditors and cash and cash equivalents are considered to be the same as their fair values, due to their short-term nature.

The fair values for loans, bank balances, investment and other financial assets & liabilities were calculated based on cash flows discounted using a current lending rate.

They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including counterparty credit risk.

**29 Financial risk management**

The Company has exposure to the following type of risks from financial instruments:

- Credit risks
- Liquidity risks
- Market risks

**Risk management framework**

The Company's principal financial liabilities comprise borrowings, trade & other payable and other financial. The main purpose of these financial liabilities is to finance the Company's operations and to provide guarantee to support its operations. the Company's principal financial assets include loans, trade and other receivables, cash and cash equivalents that derive its value directly from its operations.

The Company's activities expose it to market risk, credit risk and liquidity risk. the Company's risk management is carried out by the management under the policies approved by the board of directors that help in identification, measurement, mitigation and reporting all risks associated with the activities of the Company. These risks are identified on a continues basis. and assessed for impact on financial performance. The Board of Directors reviews and agrees policy for managing each of these risks.

**29.1 Credit risk:**

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument will not meet its contractual obligations under a financial instrument or customer contract, leading to a financial loss. the Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its investing/financing activities, including deposits with banks, foreign exchange transactions and other financial instruments. the Company has no significant concentration of credit risk with any counterparty.

The carrying amount of financial instruments represents the maximum exposure to credit risk.

**Trade receivables**

The management has established a credit policy under which each new customer is analysed individually for creditworthiness before the Company's standard payment and delivery terms and conditions are offered. the Company's review includes external ratings, if they are available, financial statements, credit agency information, industry information and in some cases bank references before making sales to a new customer.

the Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may affect the credit risk of its customer base, including the default risk associated with the industry and the country in which the customers operate. the Company limits its exposure to credit risk from trade receivables by establishing a payment term for its customers.

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivable. Under the simplified approach, the Company does not track changes in credit risk. Rather, it recognizes impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

The Company uses a provision matrix to determine impairment loss allowance on the portfolio of trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivable and is adjusted for forward looking estimates. At year end, the historically observed default rates are updated and changes in the forward-looking estimates are analysed.

Individual receivables which are known to be uncollectible are written off by reducing the carrying amount of trade receivable and the amount of the loss is recognised in the statement of profit and loss.

**29.2 Liquidity risk**

Liquidity risk is defined as the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or other financial assets. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of credit facilities to meet obligations when due. the Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company aims to maintain the level of its cash and cash equivalents and other highly marketable debt instruments at an amount in excess of expected cash outflows on financial liabilities at any point of time.

**Exposure to liquidity risk**

The table below provides the details regarding the the remaining contractual maturities of financial liabilities at the reporting date based on contractual undiscounted payments

|   | Less than 1   | 1-5 years    | More than 5 | Total         |

| <b>Total non-derivative financial liabilities</b> | <b>132.95</b> | <b>64.92</b> | -           | <b>197.87</b> |

**ASM Digital Engineering Private Limited**  
**Notes to financial statements for the year ended March 31, 2024**

**30 Capital Management:**

The Company's objectives of capital management is to maximize the shareholder value. In order to maintain or adjust the capital structure, the Company may adjust the return to shareholders, issue/ buyback shares or sell assets to reduce debt. The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

The Company monitors capital using a gearing ratio, which is net debt divided by total equity plus net debt as below.

|   | As at March 31,<br>2024 | As at March 31,<br>2023 |
|---|-------------------------|-------------------------|
| Borrowings  | <b>112.27</b>           | 15.08                   |
| Other financial liabilities (non current & current) | <b>64.92</b>            | 89.65                   |
| Trade payables                                      | <b>6.64</b>             | 93.14                   |
| Less: Cash and bank balances                        | <b>(10.01)</b>          | (0.44)                  |
| <b>Net debt (A)</b>                                 | <b>173.82</b>           | <b>197.43</b>           |
| Equity Share capital                                | <b>40.00</b>            | 40.00                   |
| Other Equity  | <b>75.07</b>            | 85.47                   |
| <b>Equity (B)</b>                                   | <b>115.07</b>           | <b>125.47</b>           |
| <b>Equity plus net debt ( C = A + B )</b>           | <b>288.89</b>           | <b>322.90</b>           |
| <b>Gearing ratio ( D = A / C )</b>                  | <b>60.17%</b>           | <b>61.14%</b>           |

The Company's capital management, amongst other things, aims to achieve the objective of maximising shareholders value.  
No changes were made in the objectives, policies or processes for managing capital during the current and previous years

## 1 BACKGROUND:

RV Forms and Gears LLP ("the Firm") was incorporated as a limited liability partnership firm on the May 05, 2018. The Firm carries on the business of manufacturing of jigs, fixtures, welding jigs, machinery center fixtures, assembly fixtures and gauges etc and providing Engineering technical Services. The Firm is a subsidiary of ASM Technologies Limited.

## 2 MATERIAL ACCOUNTING POLICIES:

### 2.1 Basis of Preparation:

In accordance with the notification issued by the Ministry of Corporate Affairs, the Firm has adopted Indian Accounting Standards ('Ind AS') notified under the Companies (Indian Accounting Standards) Rules, 2015 with effect from April 1, 2016. The standalone financial statements of the Firm are prepared and presented in accordance with Ind AS.

The financial statements have been prepared on the historical cost basis, except for certain financial instruments which are measured at fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

### 2.2 Summary of material accounting policies:

#### a) Use of estimates:

The preparation of financial statements in conformity with Ind AS requires the management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods. Any revision to accounting estimates is recognized prospectively.

#### b) Current versus non-current classification:

the Firm presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle.
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is treated as current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/ liabilities are classified as non-current assets/ liabilities.

#### c) Property, Plant and Equipment:

- (i) Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.
- (ii) Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately. This applies mainly to components for machinery. When significant parts of plant and equipment are required to be replaced at intervals, the Firm depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in income statement as and when incurred.

- (iii) Subsequent expenditure related to an item of property, plant and equipment is added to its book value only if it increases the future benefits from its previously assessed standard of performance. All other expenses on existing property, plant and equipment, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the income statement for the period during which such expenses are incurred.
- (iv) An item of property, plant and equipment and any significant part initially recognized is de-recognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the Property, plant and equipment is de-recognized.
- (v) Expenditure directly relating to construction activity is capitalized. Indirect expenditure incurred during construction period is capitalized to the extent to which the expenditure is indirectly related to construction or is incidental thereto. Other indirect expenditure (including borrowing costs) incurred during the construction period which is neither related to the construction activity nor is incidental thereto is charged to the income statement.
- (vi) Costs of assets not ready for use at the balance sheet date are disclosed under capital work- in- progress.
- (vii) Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date is classified as capital advances under other non-current assets.

**d) Depreciation:**

Depreciation is calculated on straight line method using the following useful lives estimated by the management, as specified in Schedule II to the Companies Act, 2013 or estimated useful life which is as under:

| <b>Nature of Asset</b>           | <b>Useful life</b> |
|----------------------------------|--------------------|
| Plant & Machinery                | 15 years           |
| Electric & Electronic equipments | 10 years           |
| Office & Other equipments        | 5 years            |
| Computers & Software             | 3 Years            |
| Leasehold Improvements           | 5 Years            |
| Furniture & Fittings             | 8 years            |

**e) Intangible Asset**

- (i) Intangible assets are stated at cost less accumulated amortization and impairment. Intangible assets are amortized over their respective estimated individual useful lives on a straight-line basis, from the date that they are available for use. The estimated useful life of an identifiable intangible asset is based on a number of factors including the effects of obsolescence, demand, competition and other economic factors (such as stability of the industry, and known technological advances), and the level of maintenance expenditures required to obtain the expected future cash flows from the asset. Amortization methods and useful lives are reviewed periodically including at each financial year end.

Research costs are expensed as incurred. Software product development costs are expensed as incurred unless technical and commercial feasibility of the project is demonstrated, future economic benefits are probable, the firm has an intention and ability to compete and use or sell the software and the costs can be measured reliably. The cost which can be capitalized include the cost of material, direct labour, overhead costs that are directly attributable to preparing the asset for its intended use.

**f) Investment Property:**

- (i) Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment loss, if any.
- (ii) The cost includes the cost of replacing parts and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of the investment property are required to be replaced at intervals, the Firm depreciates them separately based on their specific useful lives. All other repair and maintenance costs are recognized in income statement as and when incurred.
- (iii) Though the Firm measures investment property using cost based measurement, the fair value of investment property is disclosed in the notes. Fair values are determined based on an annual evaluation performed by an accredited external independent valuer.

(iv) Investment properties are de-recognized either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in income statement in the period of de-recognition.

**g) Impairment :**

1) *Financial Asset:*

the Firm assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. the Firm recognises lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

2) *Non-financial asset:*

The Firm assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Firm estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

Impairment losses are recognized in the statement of profit and loss. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

**h) Leases:**

*Where the Firm is Lessee:*

- 1 The Company's lease asset classes primarily consist of leases for buildings. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:
  - (i) the contact involves the use of an identified asset
- 2 At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.
- 3 Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.
- 4 Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. Right of use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets.
- 5 The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Company changes its assessment if whether it will exercise an extension or a termination option.
- 6 Lease liability and ROU have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.
- 7 The borrowing rate applied to lease liabilities for discounting is 12.55%

**i) Inventories:**

Inventories are valued at cost determined on weighted average basis or net realizable values whichever is lower.

**j) Revenue Recognition:**

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured.

The firm collects taxes such as goods and service tax etc on behalf of the government and, therefore, these are not economic benefits flowing to the company. Hence, they are excluded from the aforesaid revenue/income.

The following specific recognition criteria must also be met before revenue is recognized:

**(i) Sale of Goods:**

Revenue from the sale of goods is recognised when all the following conditions are satisfied:

- > The company has transferred to the buyer, The significant risks and rewards of ownership of goods;
- > The company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- > The amount of revenue can be measured reliably;
- > It is probable that the economic benefits associated with the transactions will flow to the company;
- > The costs incurred or to be incurred in respect of the transaction can be measured reliably;

**(ii) Income from services is recognised on rendering of services.**

Interest is accounted as per effective interest method.

**k) Employee Benefits:**

**(i) Short term employee benefits:**

The employee benefits payable wholly within twelve months of rendering the service are classified as short term employee benefits. Benefits such as salaries, leave travel allowance, short term compensated absences etc. and the expected cost of bonus are recognised in the period in which the employee renders the related service.

**(ii) Long term employee benefits:**

**(a) Defined Contribution Plans:**

the Firm has contributed to state governed provident fund scheme, employee's state insurance scheme and employee pension scheme which are defined contribution plans. The contribution paid/ payable under the schemes is recognised during the period in which employee renders the related service.

**(b) Defined Benefit Plans:**

Gratuity, which is a defined benefit plan, is accrued based on an independent actuarial valuation, which is done based on project unit credit method as at the balance sheet date. the Firm recognizes the net obligation of a defined benefit plan in its balance sheet as an asset or liability. Gains and losses through re-measurements of the net defined benefit liability/ (asset) are recognized in other comprehensive income. In accordance with Ind AS, re-measurement gains and losses on defined benefit plans recognized in OCI are not to be subsequently reclassified to statement of profit and loss. As required under Ind AS compliant Schedule III, the Firm recognizes re-measurement gains and losses on defined benefit plans (net of tax) to retained earnings.

Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short-term employee benefit. the Firm measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

the Firm treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method, made at the end of each financial year. Actuarial gains/losses are immediately taken to the statement of profit and loss. the Firm presents the accumulated leave liability as a current liability in the balance sheet, since it does not have an unconditional right to defer its settlement for twelve months after the reporting date.

**I) Income Taxes:**

Income tax expense comprises current tax expense and the net change in the deferred tax asset or liability during the year. Current and deferred tax are recognized in the statement of profit and loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity, respectively.

*i) Current Income Tax:*

Current income tax for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the taxable income for that period. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the balance sheet date.

*ii) Deferred Income Tax:*

Deferred income tax is recognised using the balance sheet approach, deferred tax is recognized on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes, except when the deferred income tax arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profit or loss at the time of the transaction.

Deferred income tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date.

**m) Segment reporting:**

*i) Identification of segments:*

the Firm's operating businesses are organized and managed separately according to the nature of products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. The analysis of geographical segments is based on the areas in which major operating divisions of the Firm operate.

*ii) Unallocated items*

Unallocated items include general corporate asset, liability, income and expense items which are not allocated to any business segment.

*iii) Segment accounting policies*

the Firm prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Firm as a whole.

**n) Provisions and Contingent liabilities:**

A provision is recognized when the Firm has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Firm or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. the Firm does not recognize a contingent liability but discloses its existence in the financial statements.

**o) Financial Instruments:**

Financial assets and liabilities are recognized when the Firm becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

*i) Cash & Cash equivalents:*

the Firm considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

*ii) Financial assets at amortized cost:*

Financial assets are subsequently measured at amortized cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

*iii) Financial assets at fair value through other comprehensive income:*

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

*iv) Financial assets at fair value through profit or loss:*

Financial assets are measured at fair value through profit or loss unless it is measured at amortized cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognized in statement of profit and loss.

*v) Financial liabilities:*

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit or loss. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

*vi) De-recognition of financial instruments:*

the Firm derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized when the obligation specified in the contract is discharged or cancelled or expires.

vii) *Fair value of financial instruments:*

In determining the fair value of its financial instruments, the Firm uses following hierarchy and assumptions that are based on market conditions and risks existing at each reporting date.

Fair value hierarchy:

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Firm determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

**2.3 Significant accounting judgements, estimates and assumptions:**

The preparation of the Firm's standalone financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

*a) Judgements:*

In the process of applying the Firm's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the financial statements:

*(b) Estimates and assumptions:*

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Firm based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Firm. Such changes are reflected in the assumptions when they occur.

**Defined benefit plans - Gratuity**

The cost of the defined benefit gratuity plan and other post-employment medical benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds

The mortality rate is based on publicly available mortality tables. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases are based on expected future inflation rates and expected salary increase thereon.

**3. Property, Plant and Equipment**

| Particulars          | Plant & Machinery | Tools & consumables | Computers    | Furniture & Fittings | Office Equipments | Leasehold Improvements | Vehicles    | Right of Use | Total         | (Rs. In Millions) |
|----------------------|-------------------|---------------------|--------------|----------------------|-------------------|------------------------|-------------|--------------|---------------|-------------------|
| <b>Cost</b>          |                   |                     |              |                      |                   |                        |             |              |               |                   |

**39 Financial risk management**

The Company has exposure to the following type of risks from financial instruments:

- Credit risks
- Liquidity risks
- Market risks

**Risk management framework**

The Company's principal financial liabilities comprise borrowings, trade & other payable and other financial. The main purpose of these financial liabilities is to finance the Company's operations and to provide guarantee to support its operations. The Company's principal financial assets include loans, trade and other receivables, cash and cash equivalents that derive its value directly from its operations.

The Company's activities expose it to market risk, credit risk and liquidity risk. The Company's risk management is carried out by the management under the policies approved by the board of directors that help in identification, measurement, mitigation and reporting all risks associated with the activities of the Company. These risks are identified on a continues basis. and assessed for impact on financial performance. The Board of Directors reviews and agrees policy for managing each of these risks.

**39.1 Credit risk:**

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument will not meet its contractual obligations under a financial instrument or customer contract, leading to a financial loss. the Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its investing/financing activities, including deposits with banks, foreign exchange transactions and other financial instruments. the Company has no significant concentration of credit risk with any counterparty.

The carrying amount of financial instruments represents the maximum exposure to credit risk.

**Trade receivables**

The management has established a credit policy under which each new customer is analysed individually for creditworthiness before the Company's standard payment and delivery terms and conditions are offered. the Company's review includes external ratings, if they are available, financial statements, credit agency information, industry information and in some cases bank references before making sales to a new customer.

the Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may affect the credit risk of its customer base, including the default risk associated with the industry and the country in which the customers operate. the Company limits its exposure to credit risk from trade receivables by establishing a payment term for its customers.

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivable. Under the simplified approach, the Company does not track changes in credit risk. Rather, it recognizes impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

The Company uses a provision matrix to determine impairment loss allowance on the portfolio of trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivable and is adjusted for forward looking estimates. At year end, the historically observed default rates are updated and changes in the forward-looking estimates are analysed.

Individual receivables which are known to be uncollectible are written off by reducing the carrying amount of trade receivable and the amount of the loss is recognised in the statement of profit and loss.

**39.2 Liquidity risk**

Liquidity risk is defined as the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or other financial assets. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of credit facilities to meet obligations when due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company aims to maintain the level of its cash and cash equivalents and other highly marketable debt instruments at an amount in excess of expected cash outflows on financial liabilities at any point of time.

**Exposure to liquidity risk**

The table below provides the details regarding the the remaining contractual maturities of financial liabilities at the reporting date based on contractual undiscounted payments

|   | <u>Less than 1 year</u> | <u>1-5 years</u> |

**40 Capital Management:**

The Firm's objectives of capital management is to maximize the shareholder value. In order to maintain or adjust the capital structure, the Firm may adjust the return to shareholders, issue/ buyback shares or sell assets to reduce debt. The Firm manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

The Firm monitors capital using a gearing ratio, which is net debt divided by total equity plus net debt as below.

|   | <u>As at March 31, 2024</u> | <u>As at March 31, 2023</u> |
|---|-----------------------------|-----------------------------|
| Borrowings  | 391.65                      | 302.78                      |
| Other financial liabilities (non current & current) | 52.44                       | 8.89                        |
| Trade payables                                      | 168.38                      | 168.38                      |
| Less: Cash and bank balances                        | (1.39)                      | (4.84)                      |

| Other Equity  | (201.57)                    | (107.34)                    |
| <b>Equity (B)</b>                                   | <b>(178.46)</b>             | <b>(84.23)</b>              |
| <b>Equity plus net debt ( C = A + B )</b>           | <b>432.61</b>               | <b>390.98</b>               |
| <b>Gearing ratio ( D = A / C )</b>                  | <b>1.41</b>                 | <b>1.22</b>                 |

The Firm's capital management, amongst other things, aims to achieve the objective of maximising shareholders value. No changes were made in the objectives, policies or processes for managing capital during the current and previous years.

**RV Forms and Gears LLP**  
**Notes to Financial Statements for the year ended March 31, 2024**  
**(All amounts in Indian Rupees in millions except as otherwise stated)**

**41 Post-employment benefits**

i) **Gratuity**

The Company has a defined benefit gratuity plan. The gratuity plan is governed by the Payment of Gratuity Act, 1972. Every employee who has completed five years or more of service is entitled to gratuity of 15 days salary (last drawn salary) for each completed year of service. The scheme is not funded.

The following tables summarize the components of net benefit expense recognized in the statement of profit and loss and amounts recognized in the balance sheet for the gratuity plan:

**Statement of Profit and Loss**

| Net employee benefit expenses recognised in the employee cost: |                       | (Rs. In Millions)     |  |
|--|-----------------------|-----------------------|--|
| Particulars  | March 31, 2024<br>Rs. | March 31, 2023<br>Rs. |  |
| Current service cost   | 1.68                  | 1.79                  |  |
| Past service cost  | -                     | -                     |  |
| Interest cost  | 0.49                  | 0.33                  |  |
| <b>Net Benefit Expense</b>                                     | <b>2.17</b>           | <b>2.12</b>           |  |

**Balance Sheet**

| Benefit Asset/ Liability:                   |                       | (Rs. In Millions)     |  |

|                        | Decreases 1% | 0.04           | 0.02           |
| Salary escalation rate | Increases 1% | 0.88           | 0.84           |
|                        | Decreases 1% | (0.77)         | (0.74)         |

**Description of funding arrangements and funding policy that affect future contributions**

The plan is unfunded and the status is unlikely to change over the next few years.

**Maturity profile**

| Projected Benefits Payable in Future Years From the Date of Reporting | March 31, 2024 | March 31, 2023 |
|---|----------------|----------------|
| 1st following year  | 1.51           | 0.46           |
| 2nd following year  | 0.44           | 1.31           |
| 3rd following year  | 0.47           | 0.67           |
| 4th following year  | 1.51           | 0.51           |
| 5th following year  | 0.85           | 1.93           |
| Sum of years 6 to 10  | 3.87           | 4.25           |
| Sum of Years 11 and above   | 13.63          | 12.75          |

**ii) Leave benefits:**

An actuarial valuation of leave benefits is carried out by an independent actuary. Based on that, the Company is carrying a liability of Rs 3.23 millions.

The principal assumptions used in determining post-employment benefit obligations for the company's plans are shown below:

| Particulars            | 31-Mar-24 | 31-Mar-23 |
|------------------------|-----------|-----------|
| Salary Escalation rate | 7.00%     | 7.00%     |
| Discount rate          | 7.22%     | 7.52%     |
| Attrition rate         | 5.00%     | 5.00%     |

**42** The Firm has incurred a net loss of Rs.94.23 million and its net worth has been completely eroded as at the end of year. The Firm's current liabilities exceed by Rs. 194.71 million as compared to its to current assets. However, the Firm's holding company is authorized by its Board to infuse further funds as and when required. And the management has drawn up actions plan which would reduce the Firm's operating costs in the ensuing years. Based on this, the management is of the opinion that the going concern assumption in preparation of financial statements is appropriate.

**43** No funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person(s) or entity(ies), including foreign entities ("Intermediaries") with the understanding, whether recorded in writing or otherwise, that the Intermediary shall lend or invest in party identified by or on behalf of the Company (Ultimate Beneficiaries). The Company has not received any fund from any party(s) (Funding Party) with the understanding that the Company shall whether, directly or indirectly lend or invest in other persons or entities identified by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries

**44** The Code on Social Security 2020 ("the Code") relating employee benefits, during the employment and post employment, has received presidential assent on September 28, 2020. The Code has been published in the Gazette of India. Further, the Ministry of Labour and Employment has released draft rules for the Code on November 13, 2020. However, the effective date from which the changes are applicable is yet to be notified and rules for quantifying the financial impact are yet to be issued. The Firm will assess the impact of the Code and will give appropriate impact in the financial statements in the period in which the Code becomes effective and the related rules to determine the financial impact are published.

**RV Forms and Gears LLP**  
**Notes to Financial Statements for the year ended March 31, 2024**

**46 Additional Disclosures:**

- i) Transactions and balances with companies which have been removed from register of Companies [struck off companies] as at the above reporting periods is Nil.
- ii) The Firm has not traded / invested in Crypto currency.
- iii) The Firm has no such transaction which is not recorded in the books of accounts that has been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (such as, search or survey or any other relevant provisions of the Income Tax Act, 1961).
- iv) The Firm is not a declared wilful defaulter by any bank or financial Institution or other lender.
- v) The Firm does not have any Benami property, where any proceeding has been initiated or pending against the Company for holding any Benami property.

**47** Previous year figures have been regrouped/recasted wherever necessary to conform with the current year figures.

**ASM HHV Engineering Pvt Ltd**  
**Notes to financial statements for the year ended March 31, 2024**

**1) Corporate information :-**

ASM HHV Engineering Private Limited ("the Company") was incorporated on January 21, 2022. The Company is a Joint Venture between ASM Technologies Limited and Hind High Vacuum Company Private Limited. The Company is carrying on the business of manufacturing tools, sub-systems, sub-system components and other components for the semiconductors.

**2) Material Accounting Policies:**

**(i) Basis of preparation of Financial Statements**

The financial statements have been prepared on the historical cost basis, except for certain financial instruments which are measured at fair values at the end of each reporting period if any. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

**ii) Material Accounting policies:**

**(a) Use of estimates:**

The preparation of financial statements in conformity with Ind AS requires the management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods. Any revision to accounting estimates is recognized prospectively.

**(b) Current versus non-current classification:**

the Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purposes of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purposes of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. the Company has evaluated and considered its operating cycle as One year and accordingly has reclassified its assets and liabilities into current and non-current:

Assets and liabilities, other than those discussed above, are classified as current to the extent they are expected to be realized/ are contractually repayable within 12 months from the Balance sheet date and as non-current, in other cases.

Deferred tax assets/ liabilities are classified as non-current assets/ liabilities.

**ASM HHV Engineering Pvt Ltd**  
**Notes to financial statements for the year ended March 31, 2024**

**(c) Property, plant and equipment:**

Property, plant and equipment are stated at cost of acquisition or construction, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price including import duties and other non-refundable taxes or levies, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

Subsequent expenditure related to an item of property, plant and equipment is added to its book value only if it increases the future benefits from its previously assessed standard of performance. All other expenses on existing property, plant and equipment, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the Statement of Profit and Loss for the period during which such expenses are incurred.

Borrowing costs directly attributable to acquisition of property, plant and equipment which take substantial periods of time to get ready for its intended use are also included to the extent they relate to the period till such assets are ready to be put to use.

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date is classified as capital advances under other non-current assets.

An item of property, plant and equipment and any significant part initially recognized is de-recognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the Property, plant and equipment is de-recognized.

**(d) Depreciation:**

Depreciation is calculated on Straight Line Method based on useful lives as prescribed under Schedule II to the Companies Act, 2013. Depreciation on additions is provided on pro rata basis based on the number of days put to use.

**(e) Capital Work in Progress:**

Costs of assets not ready for use at the balance sheet date are disclosed under capital work- in- progress. Capital work in progress comprises the cost of fixed assets under construction and not yet ready for their intended use. Capital work in progress is carried at cost, comprising direct cost, related incidental expenses.

Expenditure directly relating to construction activity is capitalized. Indirect expenditure incurred during construction period is capitalized to the extent to which the expenditure is indirectly related to construction or is incidental thereto. Other indirect expenditure (including borrowing costs) incurred during the construction period which is neither related to the construction activity nor is incidental thereto is charged to the Statement of Profit and Loss.

**(f) Intangible assets**

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any.

Intangible assets comprising of computer software are amortized on a written down value basis over a period of three years, which is estimated by the management to be the useful life of the asset.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit and Loss when asset is derecognized.

**ASM HHV Engineering Pvt Ltd**  
**Notes to financial statements for the year ended March 31, 2024**

**(g) Inventories:**

Inventories which comprise of raw materials and components, work-in-progress, finished goods, stock in-trade, store and spares are carried at the lower of cost and net realisable value. Cost is ascertained on a weighted average cost basis and is defined as being all expenditure, which has been incurred in bringing the product or service to its present location and condition. In the case of manufactured inventories and work in progress, cost is determined on the basis of cost of manufacturing which includes material, labour and manufacturing overheads. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

**(h) Expenditure:**

Expenses are accounted on the accrual basis and provisions are made for all known losses and liabilities.

**(i) Borrowing costs:**

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized/inventorised as part of the cost of the respective asset. All other borrowing costs are charged to Statement of Profit and Loss.

**(j) Revenue recognition:**

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

the Company collects taxes such as service tax, goods & service tax etc on behalf of the Government and, therefore, these are not economic benefits flowing to the Company. Hence, they are excluded from the aforesaid revenue/ income.

**Interest Income:**

Interest income on term deposits & others are recognised on accrual basis. Interest income on account of financial instruments measured at amortised cost if any, is recognised using effective interest rate method.

**(k) Cash flow statement:**

Cash Flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating, financing and investing activities of the Company are segregated.

**(l) Foreign Currency Transaction:**

**Functional and presentation currency**

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates ('the functional currency'). The financial statements are presented in Indian rupee (INR), which is the Company's functional and presentation currency.

Foreign currency transactions and balances

**i) Initial recognition** - Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

**ii) Conversion** - Foreign currency monetary items are retranslated using the exchange rate prevailing at the reporting date. Non-monetary items, which are measured in terms of historical cost denominated in a foreign currency, are reported using the exchange rate at the date of the transaction. Non-monetary items, which are measured at fair value or other similar valuation denominated in a foreign currency, are translated using the exchange rate at the date when such value was determined.

**ASM HHV Engineering Pvt Ltd**

**Notes to financial statements for the year ended March 31, 2024**

**(iii) Exchange differences** - the Company accounts for exchange differences arising on translation/ settlement of foreign currency monetary items as income or as expense in the period in which they arise.

**(m)Provisions and Contingent Liabilities:**

A provision is recognized when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

A contingent liability is a possible obligation that arises from past events whose existence will be conCompanyed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. the Company does not recognize a contingent liability but discloses its existence in the financial statements.

**(n) Financial Instruments:**

Financial assets and liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

**(i) Cash and cash equivalents**

the Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

**(ii) Financial assets at amortized cost**

Financial assets are subsequently measured at amortized cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

**(iii) Financial assets at fair value through other comprehensive income**

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

**(iv) Financial assets at fair value through profit or loss**

Financial assets are measured at fair value through profit or loss unless it is measured at amortized cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognized in Statement of Profit and Loss.

**(v) Debt instruments at amortized cost**

A 'debt instrument' is measured at the amortized cost if both the following conditions are met:

a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and

**ASM HHV Engineering Pvt Ltd**

**Notes to financial statements for the year ended March 31, 2024**

b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance income in the profit or loss. The losses arising from impairment are recognized in the profit or loss. This category generally applies to trade and other receivables.

**(vi) Financial liabilities**

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit or loss. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

**(vii) De-recognition of financial instruments**

the Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized when the obligation specified in the contract is discharged or cancelled or expires.

A 'debt instrument' is measured at the amortized cost if both the following conditions are met:

a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and

b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance income in the profit or loss. The losses arising from impairment are recognized in the profit or loss. This category generally applies to trade and other receivables.

**(o) Earnings per share**

In determining earnings per share, the Company considers the net profit after tax and includes the post tax effect of any extraordinary item. The number of equity shares used in computing basic earnings per share is the weighted average number of equity shares outstanding during the period. The number of equity shares used in computing diluted earnings per share comprises weighted average number of equity shares considered for deriving basic earnings per share and also weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

**ASM Technologies Kabushiki Kaisha, Japan**  
**Notes to Financial Statement for the year ended March 31, 2024**

**1 CORPORATE INFORMATION**

ASM Technologies KK ("the Company"), is a Company incorporated in Japan and is a wholly owned subsidiary of ASM Technologies Limited. The Company is in the business of development of software and allied services.

**2.1 MATERIAL ACCOUNTING POLICIES:**

**a) Basis of Preparation**

In accordance with the notification issued by the Ministry of Corporate Affairs, the Company has adopted Indian Accounting Standards ('Ind AS') notified under the Companies (Indian Accounting Standards) Rules, 2015. The financial statements of the Company are prepared and presented in accordance with Ind AS.

The financial statements have been prepared on the historical cost basis, except for certain financial instruments which are measured at fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

**b) Use of estimates**

The preparation of financial statements in conformity with Ind AS requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities as at the date of the financial statements and reported amounts of income and expense during the year. Example of such estimates include provision for doubtful receivables, employee benefits, provision for income taxes, accounting for contract costs expected to be incurred, the useful lives of depreciable property, plant and equipment and provision for impairment.

*i) Significant accounting judgements, estimates and assumptions*

The preparation of the Company's standalone financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

*a) Judgements*

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the financial statements:

*b) Estimates and assumptions*

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

**Current versus non-current classification:**

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purposes of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purposes of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

**ASM Technologies Kabushiki Kaisha, Japan**  
**Notes to Financial Statement for the year ended March 31, 2024**

All other liabilities are classified as non-current.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has evaluated and considered its operating cycle as One year and accordingly has reclassified its assets and liabilities into current and non-current:

Assets and liabilities, other than those discussed above, are classified as current to the extent they are expected to be realized/ are contractually repayable within 12 months from the Balance sheet date and as non-current, in other cases.

Deferred tax assets/ liabilities are classified as non-current assets/ liabilities.

**c) Leases**

*Where Company is a Lessee:*

The Company's lease asset classes primarily consist of leases for buildings. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- (i) the contact involves the use of an identified asset
- (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease
- (iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Company changes its assessment if whether it will exercise an extension or a termination option.

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

**d) Employee Benefits**

**(Short term Employee benefits)**

The employee benefits payable wholly within twelve months of rendering the service are classified as short term employee benefits. Benefits such as salaries, leave travel allowance, short term compensated absences etc. and the expected cost of bonus are recognised in the period in which the employee renders the related service.

**ASM Technologies Kabushiki Kaisha, Japan**  
**Notes to Financial Statement for the year ended March 31, 2024**

**e) Revenue recognition**

The Company derives revenues primarily from IT related services. Revenue is recognized upon transfer of control of promised services to customers in an amount that reflects the consideration we expect to receive in for those services.

Revenue on time-and-material contracts are recognized as the related services are performed and revenue from the end of the last invoicing to the reporting date is recognized as unbilled revenue. Revenue from fixed-price, fixed-timeframe contracts, where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognized as per the percentage-of-completion method. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such uncertainty is resolved. Efforts or costs expended have been used to measure progress towards completion as there is a direct relationship between input and productivity.

**f) Taxation**

Income tax expense comprises current tax expense and the net change in the deferred tax asset or liability during the year. Current and deferred tax are recognized in statement of profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity, respectively.

**g) Foreign currency transactions**

*Functional currency*

The functional currency of the Company is the Indian rupee.

*Transactions and translations*

Foreign currency transactions are recorded at exchange rates prevailing on the date of the transaction. Foreign currency denominated monetary assets and liabilities are restated into the functional currency using exchange rates prevailing on the balance sheet date. Gains and losses arising on settlement and restatement of foreign currency denominated monetary assets and liabilities are included in the statement of profit and loss.

**h) Provisions, Contingent liabilities and Contingent assets**

A provision is recognized when an enterprise has a present obligation (legal or constructive) as result of past event and it is probable that an outflow of embodying economic benefits of resources will be required to settle a reliably assessable obligation. Provisions are determined based on best estimate required to settle each obligation at each balance sheet date. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the time value of money is recognized as a separate item in the statement of profit and loss. Provisions for onerous contracts, i.e. contracts where the expected unavoidable costs of meeting obligations under a contract exceed the economic benefits expected to be received, are recognized when it is probable that an outflow of resources embodying economic benefits will be required to settle a present obligation as a result of an obligating event, based on a reliable estimate of such obligation.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements. A contingent asset is never recognised but only disclosed in the financial statements.

**ASM Technologies Kabushiki Kaisha, Japan**  
**Notes to Financial Statement for the year ended March 31, 2024**

**i) Financial Instruments**

Financial assets and liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability. However, investments in subsidiaries are carried at cost as required by Ind AS 27.

**(i) Cash and cash equivalents:**

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

**(ii) Financial assets at amortized cost**

Financial assets are subsequently measured at amortized cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

**(iii) Financial liabilities**

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit and loss. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

**j) Fair value of financial instruments**

In determining the fair value of its financial instruments, the Company uses following hierarchy and assumptions that are based on market conditions and risks existing at each reporting date.

Fair value hierarchy:

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

**k) Impairment**

**i) Financial Assets**

The Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Company recognises lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

**(ii) Non-financial assets**

Tangible and Intangible assets: PPE, intangible assets and investment property with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs. If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the statement of profit and loss.

**18 Segment reporting**

i) Managing Director of the company has been identified as the Chief Operations Decision Maker("CODM") as defined in Ind AS 108, Operating Segments. The company is engaged in the business of software development. The CODM reviews the performance of the Company as one entity. Accordingly, the Company has not identified any different segments. the company has not yet earned from the business of software development during the current financial year.

- ii) The company operates only in Japan, hence no geographical segments has been disclosed.
- iii) The company earns 100% income from 1 customer (Previous year- 100% from 1 customer)

**19 Approval of Financial Statements:**

The financial statements were approved by the Board of Directors on May 27, 2024.

**20** The Company's Net worth is completely eroded as at the end of the year. The company's liabilities exceed by Rs.20.08 million as compared to its total assets. However, the company's holding company will infuse funds as and when required. The management is of the opinion that the going concern assumption in the preparation of financial statements are appropriate as it is a new company incorporated in Japan and it takes substantial time to establish in that market to mobilise the business.

**21** No funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person(s) or entity(ies), including foreign entities ("Intermediaries") with the understanding, whether recorded in writing or otherwise, that the Intermediary shall lend or invest in party identified by or on behalf of the Company (Ultimate Beneficiaries). The Company has not received any fund from any party(s) (Funding Party) with the understanding that the Company shall whether, directly or indirectly lend or invest in other persons or entities identified by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries."

**22 Additional Disclosures:**
